Project 1 Email Campaign

Client	Multi-column layout	Mobile stacking	Hover effects	Animation	Radio interaction	Notes
Apple Mail on macOS	Expected to work	N/A	Expected to work	Expected to work	Expected to work	Apple Mail will provide the strongest support!
Apple Mail on iPhone	Expected to work	Expected to work	N/A on touchscreen	Expected to work	Expected to work	The media query should stack the two- and three-column sections.
Gmail Desktop	Expected to work	N/A	Expected to work	Not expected to work	Not expected to work	Gmail supports the table layout and hover styling, but unfortunately it doesn't support the animation
Gmail Mobile	Expected to work	Expected to work	N/A on touchscreen	Not expected to work	Not expected to work	The responsive layout should work, but the advanced interactive features will most likely be ignored

Outlook on Windows	Expected to mostly work	N/A	Not expected to work	Not expected to work	Not expected to work	Outlook should keep the basic layout and framework of the table but the hover effects and some other css won't look the same
Yahoo Mail Desktop	Expected to work	N/A	Expected to work	Not expected to work	Expected to work	Yahoo supports most but its animation support isn't incomplete
Yahoo Mail Mobile	Expected to work	Expected to work	N/A on touchscreen	Not expected to work	Expected to work	The responsive layout and radio controls should work but the animation probably will be ignored
